

Syed Ibrahim

Senior Full-Stack Developer (Java / React)

Lucan, Co. Dublin · 089 973 3809 · Ibrahim.syed.r@gmail.com

Professional Summary

Senior full-stack engineer with **20+ years** of Java experience, based in Dublin and working across financial services and enterprise platforms. Specialist in **Spring Boot microservices**, REST APIs, cloud-native delivery on **AWS (EKS)**, and production support at scale; **React micro-frontends (MFE)** for customer-facing booking flows.

Strong track record designing and delivering secure, high-throughput services for **Hertz**, **Mastercard**, **AIB**, and other regulated environments. Comfortable across the full delivery lifecycle — architecture, implementation, CI/CD, Kubernetes deployment, observability (Splunk, Dynatrace, Amplitude), and production incident resolution. Built and deployed a **React.js timesheet application** as a personal full-stack side project, integrated with Spring Boot microservices on AWS.

Core Skills

Area	Technologies
Backend	Java 17, Spring Boot, Spring Security, Spring Batch, Spring Retry, REST, OAuth2 / JWT, JPA / Hibernate
Integration	Kafka, IBM MQ, SOAP / REST, message-level encryption, two-way SSL
Cloud & DevOps	AWS (EKS, Lambda, API Gateway, CDK), Kubernetes, PCF, Docker, GitLab CI
Observability	Splunk, Dynatrace, Amplitude, SonarQube, Seemply
Data	Oracle, SQL, JPA; XML / XSD / JAXB
Frontend	ReactJS, TypeScript, Module Federation (MFE), React Router, Tailwind CSS, Angular, AngularJS, JavaScript, HTML/CSS
Practices	Agile / Scrum, TDD, BDD (Cucumber, JBehave)

Professional Experience

Hertz — Dublin

Senior Full-Stack Developer · Mar 2021 – Present

- Maintain and enhance **Spring Boot microservices** supporting mobile and web applications; primary backend contact for mobile API integration.
 - Re-factored the **authentication service** used by frontend and mobile clients, implementing **Spring Security** for REST API access.
 - Worked in **React MFE** features for international shop-and-book app
 - Built **Splunk** and **Dynatrace** dashboards for production monitoring; debugged and resolved production and lower-environment incidents.
 - Contributed to **AWS CDK** (TypeScript / Python) projects exposing Lambda functions via private API Gateway and VPC endpoints.
 - Optimised **IBM MQ** connection handling and service performance under production load.
 - Built **htzd-shop-and-book-mcp**, a **Spring AI** MCP server exposing Hertz rental APIs as AI tools (vehicle search, location lookup, reservation create/lookup/cancel) for chatbot and assistant integration deployed on **AWS EKS**.
 - Implemented a secure REST API proxy and OpenAPI integration for Hertz car rental booking via ChatGPT — OAuth 2.0, multi-endpoint orchestration.
-

Mastercard — Dublin

Lead Java Developer · Feb 2018 – Mar 2021

- Designed and delivered the **ABU Push** suite of microservices on **Spring Boot**.
- Built a proof of concept for **message-level encryption** (asymmetric and symmetric keys) in a customer-facing application.
- Improved throughput via **multi-threading**, connection pooling (MQ, HTTP), and **circuit breaker** patterns.
- Developed and troubleshooted **Kafka** producers and consumers; deployed and debugged services on **Pivotal Cloud Foundry**.
- Established **Splunk** dashboards, alerts, and query-based diagnostics; enforced quality gates with SonarQube and Checkmarx.

Stack: Spring Boot, Spring Batch, Spring Retry, EhCache, PCF, Kafka, Splunk

Aristotle IT Services — Dublin _(consultant placements for clients in Dublin)_

Java Consultant · May 2013 – Jan 2018

- Designed and built **JSON REST services** on Spring Boot.
 - Implemented **JWT authorisation** with Spring OAuth2 and JWT for multiple consumer applications.
 - Delivered **two-way SSL** with common-name validation; unit and integration tests with Spring Test, JUnit, Hamcrest.
 - Full-stack delivery for passport renewal workflows: AngularJS UI, **Activiti BPMN**, JPA entities, XSD design for printing-system messages.
 - Responsive UI development with AngularJS and CSS3 media queries across mobile and desktop.
 - REST APIs for the Diamond UI application (**Python / Flask / SQLAlchemy**, Knockout.js).
 - Standalone Java application generating **PAIN.008** payment XML; JAXB, JPA/Hibernate, JSR-303 validation.
 - XSLT transforms for PAIN.002 failure analysis and Excel-based reporting.
-

Barclays Technology Center — Singapore

Java Consultant · Apr 2012 – Apr 2013

- Backend development for **iBOC**, an intermediary between core banking services and an iOS iPad app for remote account opening (Spring MVC, JPA, JSON, web services).
-

HeiTech Padu Berhad — Malaysia

Java Consultant · Nov 2011 – Apr 2012

- JPJ (Road Transport Department) project: ZK UI, JPA, EJB, IBM RAD web services.
-

HP — India

Java Consultant · Aug 2010 – Nov 2011

- Legacy modernisation for **General Motors**: Struts/JSP UI, Spring-WS web services exposing mainframe data.
 - Greenfield **Centralised Rate Repository (CRR)**: JSF 2.0 Facelets, JPA, Oracle.
-

Cognizant Technology Solutions — India

Senior Associate · Dec 2009 – Jul 2010

- Migrated VB standalone app to Java Swing for **AstraZeneca**; designed core search functionality (JDOM).
- Re-platformed portal from WebSphere to Tomcat for **Schering-Plough** (Struts, Spring, Hibernate).

Verizon Data Services — India

Java Developer · Jan 2008 – Dec 2009

- **Enterprise Product Catalog (EPC):** EJB session facade, Spring wiring, JDOM XML, Oracle SQL*Loader data feeds, XSL-to-HTML transforms.

Polaris Software Lab — India

Java Developer · Sep 2005 – Dec 2007

- Client delivery for **Hitachi, Japan:** Electronic Approval System (JSP/Servlets), Struts/Hibernate localisation (NAS GUI), XML/XSLT expertise (Xalan/Xerces testing), design documentation.

Personal Projects

SLR Timesheet App — Side Project · slrtime.click

Full-stack developer · Feb 2025 – Present

End-to-end timesheet management application: React SPA with Spring Boot authentication and data services, deployed on **AWS EC2** behind **Nginx** with HTTPS.

- Built the **React JS** frontend (Create React App) with **React Router**, **Material UI**, **Tailwind CSS**, and **React Hook Form** for timesheet entry, project tracking, notes, and admin workflows.
- Implemented **JWT authentication** with refresh-token handling, protected routes, role-based admin access, OAuth2 support, and RSA password encryption via the Web Crypto API.
- Integrated with **Spring Boot REST APIs** for auth and timesheet data; designed fetch-based HTTP client with automatic token refresh and CSRF handling.
- Deployed production build as static assets on **AWS EC2** with **Nginx** reverse proxy, Let's Encrypt SSL, and SPA routing fallback.

Stack: React JS, MUI, Tailwind CSS, React Router, Context API, Spring Boot, JWT, Nginx, AWS EC2

Education

Master of Computer Applications (MCA) — 76.8%

Certifications

- Cloudera Certified Apache Hadoop Developer (CCDH-410) — 81%
- Sun Certified Java Programmer (SCJP 1.4) — 88%
- Sun Certified Web Component Developer (SCWCD 1.3) — 84%
- Sun Certified Business Component Developer (SCBCD 2.0) — 92%

Additional Information

- **Location:** Lucan, Co. Dublin
- **Languages:** English (professional)
- **Work authorisation:** Based in Ireland; eligible to work in Dublin without relocation
